

HOW TO PROPERLY PACKAGE 3, 6, 9 & 12-PAK VINPAK WINE SHIPPERS

STEP 1:

Close the flaps at the bottom-end of the box, and "H-Tape" them shut.

STEP 2:

Put the first insert into the open end of the box with the recycle code face up. The "T" shaped pressure points should be face down.

STEP 3:

Place 3 bottles of wine in the accommodating molds of the first insert.

STEP 4:

Put the 2nd insert over the 3 bottles of wine with the recycle code face down. Recycle codes and all other pressure points should be aligned between the 1st and 2nd inserts. "H-Tape" the box shut for a 3-Pak.

STEP 5:

Place 3 more bottles of wine in the accommodating molds of the second insert.

STEP 6:

Put the third insert over the 3 bottles of wine with the recycle code face up. All 3 of the "T" shaped pressure points should be aligned between the second and third inserts.

STEP 7:

From here, you can "H-Tape" the box shut for a complete 6-Pak, or go back to step three and continue on with this pattern until you have a complete 9-Pak or 12-Pak shipper.
